

### 3. 日韓ジョイントセミナー

(JSPS-KOSEF Joint Seminar, 7月15-17日)

#### Program

#### Wed, July 15

- K1. Byung Hoon Han (Natural Products Research Institute, Seoul National University)  
Antithrombotic and antimetastatic quinonoid components from *Ardisia crispa*
- J1. Ikuo Saiki (Research Institute for Wakan-Yaku, TMPU)  
A Kampo (Japanese herbal) medicine, Juzen-taiho-to, prevents liver metastasis of colon 26-L5 carcinoma cells
- K2. Ki Hwan Bae (Chungnam National University)  
Antitumor components from Korean medicinal plants
- K3. Yong Nam Han (Natural Products Research Institute, Seoul National University)  
Tissue factor inhibitors from plants
- I 101. Invited lecture: Usio Sankawa (Faculty of Pharmaceutical Sciences, TMPU)  
A new tyrosine kinase inhibitor from insect: Structure activity relationships of 5-S-glutathionyl-beta-alanyl-L-dopa (5-S-GAD) analogues

#### Thu, July 16

- I 102. Invited lecture: Katsutoshi Terasawa (Faculty of Medicine, TMPU)  
Choto-san, a Kampo medicine, in the treatment of vascular dementia: A double-blind, placebo-controlled study
- J2. Shigetoshi Kadota (Research Institute for Wakan-Yaku, TMPU)  
Search for bio-active compounds from two Chinese traditional medicines
- K4. Kuk Hyun Shin (Natural Products Research Institute, Seoul National University)  
Effects of naturally occurring coumarines on hepatic mixed function oxidase activities
- J3. Yasusi Kuraishi (Faculty of Pharmaceutical Sciences, TMPU)  
Antinociceptive action of Maoh-bushi-saishin-toh mediated by descending serotonergic systems and vagal afferents
- K5. Sam Sik Kang (Natural Products Research Institute, Seoul National University)  
Chemical constituents and activity of *Lonicera japonica*
- K6. IL Moo Chang (Natural Products Research Institute, Seoul National University)  
Tradi Med DB: A traditional oriental medicines database
- J4. Masayuki Yoshikawa (Kyoto Pharmaceutical University)  
Antidiabetogenic constituents from several medicinal foodstuffs
- K7. Sung Hyun Chung (Kyunghee University)  
Antidiabetic activity of *Mori folium* ethanol-soluble extract in db/db mice
- J5. Kazuo Watanabe (Faculty of Pharmaceutical Sciences, Chiba University)  
Ca<sup>2+</sup> channel and opiate receptor antagonistic activity of hirutine, an active principle of a

Chinese herbal medicine, *Uncaria hook*, with special reference to its traditional use for hypertension.

K8. Eun Bang Lee (Natural Products Research Institute, Seoul National University)

The effect of natural products on gastric lesion and ulcer in rats with isolation of active components

J6. Tomohito Hamasaki (Research Institute for Wakan-Yaku, TMPU)

Anti-stress effects of docosahexaenoic acid (DHA)

K9. Hack Seang Kim (College of Pharmacy, Chungbuk National University)

Preventive and therapeutic effects of ginseng saponin on the adverse actions of dependence liable drugs

J7. Masao Hattori (Research Institute for Wakan-Yaku, TMPU)

Biotransformation of paeoniflorin by human intestinal bacteria

#### **Fri, July 17**

J8. Tadato Tani (Research Institute for Wakan-Yaku, TMPU)

Historical and herbological study on traditional Chinese pharmacology

J9. Katsuko Komatsu (Research Institute for Wakan-Yaku, TMPU)

Identification on herbal medicines by gene analysis

J10. Hiroshi Watanabe, Kinzo Matsumoto and Jian-Wei Ni (Research Institute for Wakan-Yaku, TMPU)

Effects of Si-Wu-Tang (Shimotsu-to) and its constituents on spatial cognitive deficits in rats
